

On-wall speaker for indoor or protected outdoor purposes, EN54-24 certified.

### Model specification

On-wall speaker, round shape, 100V, 10W, EN54-24 certified, with bracket for indoor or protected outdoor purposes.

- wide band 6" double cone speaker
- linear audio transformer for connection to 100V constant voltage lines or 70V
- thermal fuse protection of the line in case of overheating
- bypass capacitor for systems with DC control
- ceramic type double terminals for separate connections (line input and line output)
- metal structure with round fire dome and micro drilled grid to protect the speaker
- equipped with equipotential grounding socket and hook for safety rope

Weight: 2kg.

Dimensions: Ø 184 x H 137.5 mm.

Color: White (B).

**NOTE:**

Equipped with metal junction box for connecting the wires to the terminals of the input and output lines complete with 2 clamps PG11 type. Fixing system with metal bracket.

Available fixing system with metal bracket [SWP](#) for suspended installations.

## Technical features

System	100V EN54-24
Power [Wrms]	10-5-2,5
Impedance [ohm]	890-1800-3500 (a 1KHz: 860-1700-3300) Ω
Frequency range [Hz]	240÷20000 (+/- 7dB)
SPL [1W/1m]	92dB
SPL MAX	102dB
Coverage angle [degrees]	209°
Weight [kg]	2 kg
Dimensions [mm]	Ø184 x H137,5mm
